Notice Period: Immediate

PROFESSIONAL SUMMARY

- Web Developer with nearly 3 years of experience building ERP systems, billing platforms, and enterprise web applications using React.js, JavaScript, Tailwind CSS, Java, REST APIs, and SQL.
- Strong frontend engineering expertise in responsive UI development, component-based architecture, performance optimization, and offline-first applications using Index DB.
- Experienced in Java REST API development, CRUD operations, API integration, and frontend-backend connectivity.
- Skilled in UI testing, API testing, performance testing, debugging, user flow validation, and production deployment.
- Built multilingual applications supporting 6 languages with scalable and maintainable architecture.
- Experienced in leveraging AI-assisted developer tools for debugging, productivity enhancement, and rapid prototyping.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3, PHP
Frameworks:	React.js, Next.js, Tailwind CSS, Bootstrap, jQuery
React & Frontend:	React Hooks, Context API, State Management, Reusable Components, SPA, Code Splitting, Lazy Loading, Performance Optimisation
Backend:	Node.js, Express.js, Java CRUD APIs, PHP, REST APIs, JWT, Axios, Async/Await, Payment Gateways
Build Tools:	Vite, Webpack, npm
Offline & Storage:	Index DB, offline-first architecture, time-based background server sync
DB & Tools:	PostgreSQL, MongoDB, Firebase, Git, GitHub, Postman, VS Code, Chrome DevTools, Figma
AI Tools & Skills:	GitHub Copilot, ChatGPT, Claude, Gemini, DeepSeek, Google AI Studio, Antigravity — code generation, debugging, architecture optimisation, Prompt Engineering, LLM Integration
Currently Learning:	Generative AI, RAG Applications, AI Agents, MCP (Model Context Protocol), Vector Databases, LangChain, AI-Powered SaaS Development

PROFESSIONAL EXPERIENCE

Web Developer

Zymofar Dynamic Products, India | Jun 2023 – Present

KEY PROJECTS

ERP System — Multi-Module Enterprise Application

React.js | Tailwind CSS | Java REST APIs | PostgreSQL | Index DB | Multilingual Support

- Designed a production SPA serving 50+ enterprise users across 10 modules with granular role-based access control ensuring each user sees only relevant data and actions.
- Operated as a full-stack contributor — designed Java CRUD REST APIs and built the React.js frontend end-to-end, managing async data flows with Axios and Async/Await.
- Engineered Index DB offline-first architecture enabling full offline read/write; background sync worker pushes local changes to server on reconnect — ensuring zero data loss.
- Delivered real-time inventory sync across Sales and WMS, multilingual support for English, Arabic (RTL), and Hindi enabling use by globally distributed teams.
- Optimised load performance through code splitting, lazy loading, and component memoisation.

Retail and Restaurant Billing Software

React.js | Tailwind CSS | PostgreSQL | REST APIs | Index DB | Multilingual Support

- Built a full-featured billing platform covering order entry, cart management, invoice generation, receipt printing, and payment confirmation
- Automated stock deduction on invoice confirmation, reducing manual inventory errors by 90% and providing real-time stock visibility to management.
- Implemented Index DB offline mode — billing continues uninterrupted during outages; synced to server via scheduled background jobs on reconnect.
- Delivered multilingual support (English, Arabic RTL, Hindi); built a responsive Tailwind CSS UI optimised for desktop POS terminals and tablet devices.

EDUCATION

B.E. Computer Science (2019 – 2023)

Hindusthan College of Engineering and Technology, Coimbatore

LANGUAGES

Tamil (Native), English (Professional), Kannada (Working Proficiency)
